Achieving Trusted Solutions to Support The Entire Water Cycle

Regional Presence

Listed in 2004 on the Singapore Exchange Dealing and Automated Quotation System (SGX-SESDAQ), the Company has grown to become a leading supplier in the delivery of high quality piping system solutions for infrastructure projects in the Asia Pacific region. It has also implemented a strategy of acquiring companies and forming joint ventures in order to expand beyond Asean.

Throughout the regional markets, the Company operates in four business segments, viz. potable water, wastewater, Newwater, and others. The potable water segment includes linking raw water collection points to water purification plants, or distribution pipelines bringing water supply to homes and industrial buildings. The wastewater segment includes waste and sewer pipelines that channel the discharge of waste matter to wastewater treatment plants before discharging into the sea or routed to other uses. The Newwater segment includes pipelines relating to Newwater treatment plants. The 'others' segment includes pipelines installed to the oil, gas and other needing industries.

In the pipeline is the on-going construction and expected final completion of the Company's main plant in the Tianjin's Eco-City by year 2012. The objective of this initiative is to develop a major manufacturing and logistic facility to serve the Company's growing global needs and markets.

Today, the Company is home to about 250 employees in more than 8 offices and subsidiaries across the region. Led and supported by a highly motivated and proactive team across all its operations in Asia, the Company is distinguished for delivering quality products and excellent services, making it the preferred partner to clients.

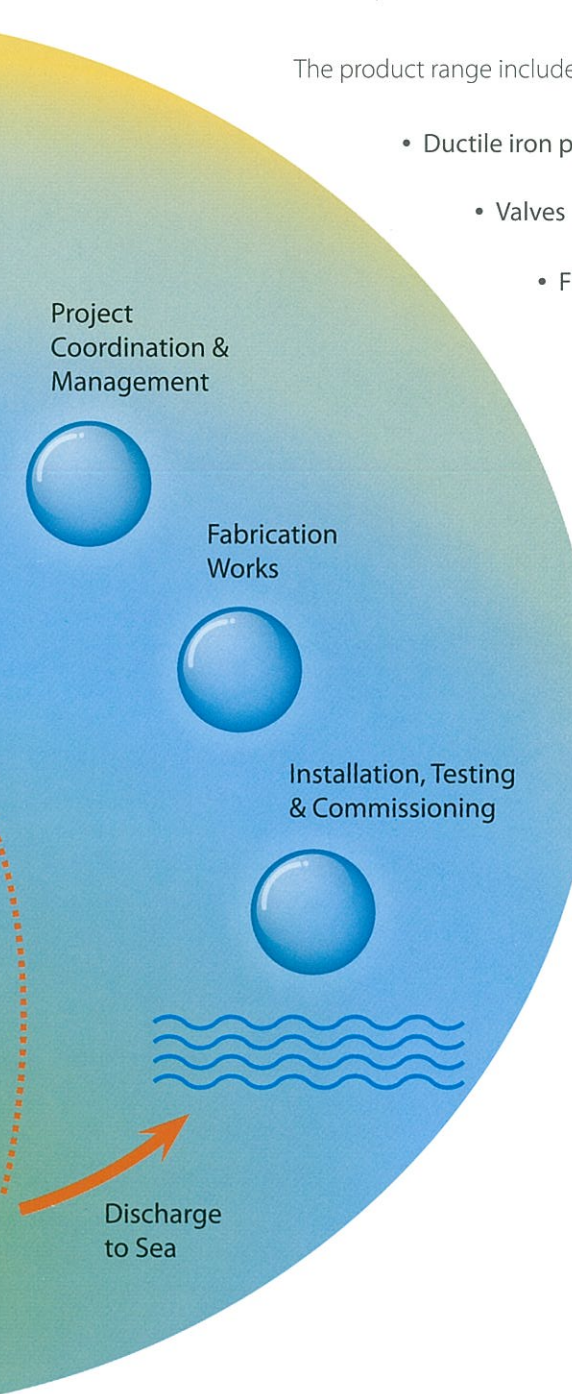

Product Range

The company supplies over 750 items and accessories crucial in the assembly of integrated water piping systems, which could also be customized through its in-house fabrication services to suit customers' specific requirements. It has the capability to fabricate the production of high quality flanged ductile iron pipes which utilizes an auto welding process that is backed by ASME Section IX:2001 certification, and conforms to the British Standards BS EN 545 and 598.

The product range includes:

- Ductile iron pipes & fittings
- Valves
- Flange adaptors
- Couplings
- Flow control equipment
- Pipeline corrosion wrapping tapes
- Manhole and ic cover
- Repair clamps
- Water meter, control & flow regulating device
- Gaskets, bolts & nuts
- Other pipes connection accessories

Our Pride and Joy

Our company has been awarded many projects to implement piping systems, pipeline rehabilitation, water and wastewater treatments - often working directly with customers or at times in collaboration with their contractors or consultants. Below is a listing of some of them:

Singapore

- Construction of Aircraft Parking Apron, Taxiways and Ancillary Works at Seletar Airport
- Membrane Bioreactor Plant (MBR) at Jurong Water Reclamation Plant (WRP)
- Improvement Works at Changi Water Reclamation Plant (CWRP)
- Proposed NEWater Infrastructure Project (NIP)
- Infrastructure Package 3 for Gardens by The Bay (Marina South)
- Marina Bay Sands Integrated Resort & Sky Park
- Marina Bay Financial Centre (MBFC)
- Orchard Turn
- Reflection Condominium @ Keppel Bay
- Singapore Changi Airport Terminal III
- Changi Water Reclamation Plant
- Ulu Padan NEWater Plant
- Bedok NEWater Factory Phase II Extension
- Punggol – Serangoon Reservoir Scheme
- Stormwater quality Management Devices – Sungei Punggol and Sungei Serangoon

Cambodia

- The Supply and Delivery of Ductile Iron Pipes, Fittings and Accessories Niroth

Doha

- Doha North Sewerage Treatment & Associated Work

Vietnam

- Kenh Dong WTP Project (HCMC)
- Nhon Trach WTP Project (Dong Nai Province)
- Tan Hiep WTP Project Biwase (Binh Duong Province)
- My Phuoc WTP Project Biwase (Binh Duong Province)
- South Binh Duong WWTP And Enviroment Improment Biwase (Binh Duong Province)
- Replacment Dn1200 Steel Pipes of Water Transmission Pipeline along Highway 1A CII (HCMC)

Hong Kong

- New territories west: term contract for waterworks district
- Hong Kong international airport
- The construction of sewers, rising mains and sewage pumping station at Kam Tin, Nan Sang Wai and Au Tau in Yuen Long
- Hong Kong , TIC Seawater Plant at West Kowloon Reclamation'
- HK/12/02- Central Reclamation Phase III project in Central Area.
- Macau, New Taipa Ferry Terminal Project

- Brunei** • The supply and delivery of 11 km of pipeline from Melabau to Kota Batu, Brunei

- Batam** • The supply and delivery of steel pipes and fittings

- Ireland** • The supply and delivery of ductile iron fittings and accessories near the City of Belfast

Our Esteemed Principals

The Company takes great pride to represent the following manufacturers and brands:

Manufacturer of Ductile Iron Pipes & Fittings

A world leader in supplying pipe joints, repair & flow control products

Xinxing Pipes - Manufacturer of DI Pipes and Fittings

Manufacturer of Gate Valves

Quality Valve Manufacturer of Metal Seated Gate Valves, Butterfly Valves, Swing Check / Non-Return Valves

A world leading designer & manufacturer of specialized rubber solutions

Manufacturer of Ductile Iron Air/Water Tight Access Covers & Frames, Manhole and IC Covers

Leader in water control technology

Manufacturer of top quality valves and accessories to the integral water cycle

Manufacturer of Industrial & Plumbing Valves

Manufacturer of exclusive corrosion & chemical resistant coatings & linings

Manufacturer of domestic meters and complex industrial flow meters

Manufacturer of earthquake resistant systems & constructing work pressure valves

Worldwide solutions provider for stormwater, wastewater & combined sewer overflow management

Specialist in Water Management Products

Pioneer in large diameter spiral pipe steel pipe

Manufacturer of non-toxic bioremediation product that solves the issue of water pollution in our oceans, lakes, and rivers

Manufacture of pipeline-related products, eg spacer and innerlynx

Supplier of Ductile Iron Pipes & Fittings and Hubless Cast Iron Pipes & Fittings

Pan Asian Holdings Limited

(formerly known as Pan Asian Water Solutions Limited) has its humble beginnings in 1979, when founder Richard Koh started the enterprise as stockist and trading in parts such as piping and valves for the water, oil and gas sectors.

OUR VISION

to become the leading provider of integrated solutions within the entire water cycle industry, regionally and globally.

OUR MISSION

to excel in the provision of innovative, dynamic and reliable solutions; proactively working and leveraging on our close partnership with our esteemed principals to deliver customized and cost-effective solutions to our customers.
